ISP History

Servicing

ISP offers in-house silk screening, plus options for embroidery, heat applied logos, special performance fabric labels, warning/instruction labels and swingtags.

Clear PVC hanging display bags or heavy duty nylon mesh options can also be personalised.

ISP continues to lead the field in the design and manufacture of lifejackets, holding approvals to ISO 12402 and EC Directive 96/98. Additionally we also work with other National Authorities to gain domestic recognition, for example USA, Canada and Australia.

ISP has developed from its original business in military clothing, accessories and inflatable lifejackets into one of the leading international suppliers of marine survival equipment.

From its research and development base over 30 years ago, the company has grown into one of the World's largest manufacturers of inflatable marine lifejackets.

ISP recommends that all inflatable marine lifejackets be inspected on an annual basis by an authorised service outlet and/or after a full gas inflation.

Bespoke, Own Label Lifejackets

Specify your own lifejacket options to suit your market needs:

Choose from:

- A wide range of cover options in design, fabric and colour with or without inspection windows.
- 6 different bladder styles in various safety colours.
- Approved manual or automatic Inflation Mechanism of your choice.
- A wide range of Waist Belt and Deck Harness options.
- Various shapes and designs of pocketry to fit MOB, PLB Electronics.

Cover Designs

ISP offer a wide range of lifejacket outer cover designs, from yoke styles, through to belt attached pouch options.

The designs are available in a wide range of fabrics from tough, hard wearing pvc coated nylon or Cordura, to soft and comfortable polyurethane coated nylon.

The cover designs satisfy every conceivable application from yachtsmen to fisherman and commercial users.

We use a wide range of the latest fabrics to suit all requirements. Many trim and feature options, such as neoprene comfort neck collars and single point indicator windows, are also available.

Covers can be closed using breakout zips or Velcro press studs. Standard colours shown in this brochure are Orange, Red, Navy, and Black. Other colours are available upon request to match your house style if required.

Jackets can be trimmed with contrasting hems e.g. Blue on Red, Black on Orange to suit your requirements and we can also fit linings which incorporate reflective thread to aid location in low light conditions.

Harness and Waist Belt Options

A range of Harnesses and Waist Belts are available to ensure that the jacket is donned correctly, quickly and easily.

Our standard webbings are manufactured from synthetic fibres to ISO 12402 standard and are available with a range of options including stainless steel D-ring, double D-ring, stainless steel 2bar/3bar fasteners, plastic buckles, side adjusters, crotch straps or grab loop.

Inflatable Bladders

A range of inflatable bladders is offered to suit the demands of a wide range of uses. These include our patented Interlock lobe design, providing self righting capabilities which are second to none.

The bladders are welded in polyurethane coated nylon, and are available in a range of approved safety colours. Oral Tubes, Whistles and reflective tape are fitted as standard.

Bladder sizes from 100 Newton to 300 Newton providing sufficient buoyancy for most activities.

Wave Barrier Technology

The patented interlocking lobe design of the bladder used in 150N-085 and 275N-044 lifejackets self-rights the wearer in under 5 seconds and provides an effective **Wave Barrier** preventing water from being channelled into the airways.

The tailored neck design gives vital support to the head and neck, even if the wearer is unconscious.

275N-044

Inflation Mechanisms

We can arm your lifejacket with any one of a variety of operating heads from all the major manufacturers.

The range includes manual, automatic and hydrostatically operated, with single point indicators if required.
